---

Prevent MacBook from sleeping while downloading a file: A lot of us use our computer for more than just Internet browsing.

1. [windows does not resume after sleep](#)
2. [wifi not working after resume from sleep](#)
3. [blue screen after resume from sleep](#)

We use it to render or convert video's, download/uploading large files, movies and many other things.. It can be annoying to just wait for it to finish and move your mouse to keep the mac active and awake until your downloads or render is over.
